

IZWireMAN Connection

Machine type 1

1. Open the front doors on the console. It will look like:

2. Locate the cable which goes to the Job card reader. Like:

3. Plug it off and replace the cable with a delivered serial cable (Null Modem cable) which goes to the COM port on the InkzonePerfect computer.

Machine type 2

The console electronic of the machine type 2 looks a bit different. Use the marked connector to establish a connection to the computer.

1. The cable is located above the green keyboard connector as shown below:

MAN ROLAND 300 (Tape)
